

What are the Benefits of Choosing IPS Laser Express?

Quality Printing – Maximum Speed

Actively managing your printing environment can reduce your annual costs 10%–30%, a potentially significant savings for most companies. IPS achieves these savings with a 3-step process:

1. Optimize Your Devices

IPS will perform a thorough assessment of your current printing infrastructure, including:

- Company-wide inventory of the number, types and locations of your print devices
- Complete audit of expenditures for labor, supplies, outside purchases and system costs

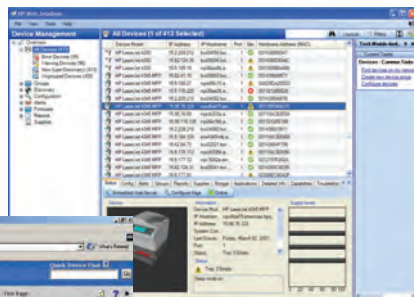

IPS will evaluate which print devices fit your needs best and advise a strategy for replacing, upgrading and retaining existing machines.

2. Manage Your Environment – Maximize Your Speed

Our print management software enables you to install, configure and troubleshoot all networked print devices right from your PC – reducing downtime, preserving print quality and improving productivity.

3. Improve Your Workflow

With optional third-party solutions, you can streamline your workflow and protect your infrastructure. Integrated document capture scans documents to email, faxes and network folders. This allows you to send directly to the printer, streamlining information delivery and job accounting, reducing costs and compliance errors and comply with security guidelines.

Managed Print Solutions

Powerful, East-to-Use Software

IPS can provide you with the information you need to take control of your printing costs. Our software allows you to view comprehensive information about your printing devices, including:

- Page counts
- Asset number
- LCD reading
- Utilization
- Serial number
- Device status
- Cost per copy
- Device description
- Toner levels
- Location
- Trending reports

Cut Your Printing Costs

- Extend the life of your document output devices
- Manage all print and copy devices on your network
- Optimize device placements
- Reduce the workload on your IT staff
- Increase uptime with a healthier fleet
- Fix problems before they occur
- Transparently view the costs associated with each device
